

## **Ryan Hendy**

Ryan is a very experienced education and training professional, with the qualifications and experience that provide a unique asset to Queensland Catch.

Most of his experience has been gained within University and Australian Defence Force departments of education, training and technology; at both an operational and strategic level.

These experiences provide a great benefit to Queensland Catch in support of education and technology strategy and advice.

Ryan has completed study at the Masters level in Information Technology, Systems Engineering and Education. These qualifications provide him with skills in analysis, management and risk mitigation to compliment his practical experience.

Ryan's interest in Queensland Catch stems from a passion for the sustainment and equitable management of our valuable fisheries, while ensuring high quality in Australian seafood. It is Ryan's belief that Australian seafood must remain a global leader in quality and practice, as well as, ensure that our fisheries are robust for future generations.
